Résumé

INTRODUCTION

My name is Daniel Eden, and I'm a designer. Since a young age, I was always fascinated by the way the world had come to be. It wasn't until a few years ago that I realised that everything was designed. A human being made a choice about the width of the coins in your pocket, the horizontal terminals of a typeface, the weight distribution of a tablespoon, and everything in between. It has become a passion of mine to design for the empowering medium of the web, in order to provoke positive human responses, present information effectively, and create intuitive and aesthetically pleasing interfaces.

As well as having a passion for design, I firmly believe in "scratching my own itch," and maintain several personal projects which have helped me learn the back-end development skills and programmatic knowledge required to create simple web applications.

In 2013, I graduated from Nottingham Trent University with a 1st class degree in Digital Media Technology BSc, and was awarded a prize for having the highest marks in my cluster. I was also a finalist for .net Magazine's "Brilliant Newcomer of The Year" award.

SKILLS

Design, Development, HTML, CSS, JavaScript, PHP, Git/Version Control

EDUCATION

Bachelor of Science with 1st Class Honours in Digital Media Technology, Nottingham Trent University, September 2009–June 2013

EMPLOYMENT

Designer, Dropbox, 2013–present
Freelance designer, 2009–2013

PROJECTS

Onword (onword.co)
Onword is a minimal and distraction-free writing environment for the web.

Gateway (gateway-learning.com)
Gateway was a University group project in collaboration with Greenhat Interactive, intended to help migrant workers gain the vocational skills needed to get a job in the UK.

Brills (brills.me)
Brills is a simple and easy to use money management web application.

Animate.css (daneden.me/animate)
Animate.css is the popular CSS animation library used by prolific websites and organizations such as EA Games, Foursquare, and Disney.

Toast (daneden.me/toast)
Toast is an open source, float-free responsive CSS framework.
